

Care Pain Relief 2.32% w/w gel

Uses

For short-term local symptomatic treatment of mild to moderate pain in acute strains, sprains or bruises following blunt trauma.

Dosage

Adults and children 14 years and over: use the lowest possible dose for the shortest time necessary to relieve symptoms, and do not use for longer than 7 days without medical advice. Can be applied up to twice a day (preferably morning and evening). Depending on the size of the site to be treated, use a cherry to walnut sized amount of gel (1-4g). The maximum daily dose is 8g of gel. If symptoms worsen or do not improve after 3-5 days, a doctor should be consulted. Under 14 years: not suitable.
